

Matera

DEDICATED TO MINES AND QUARRIES

WHO ARE WE?

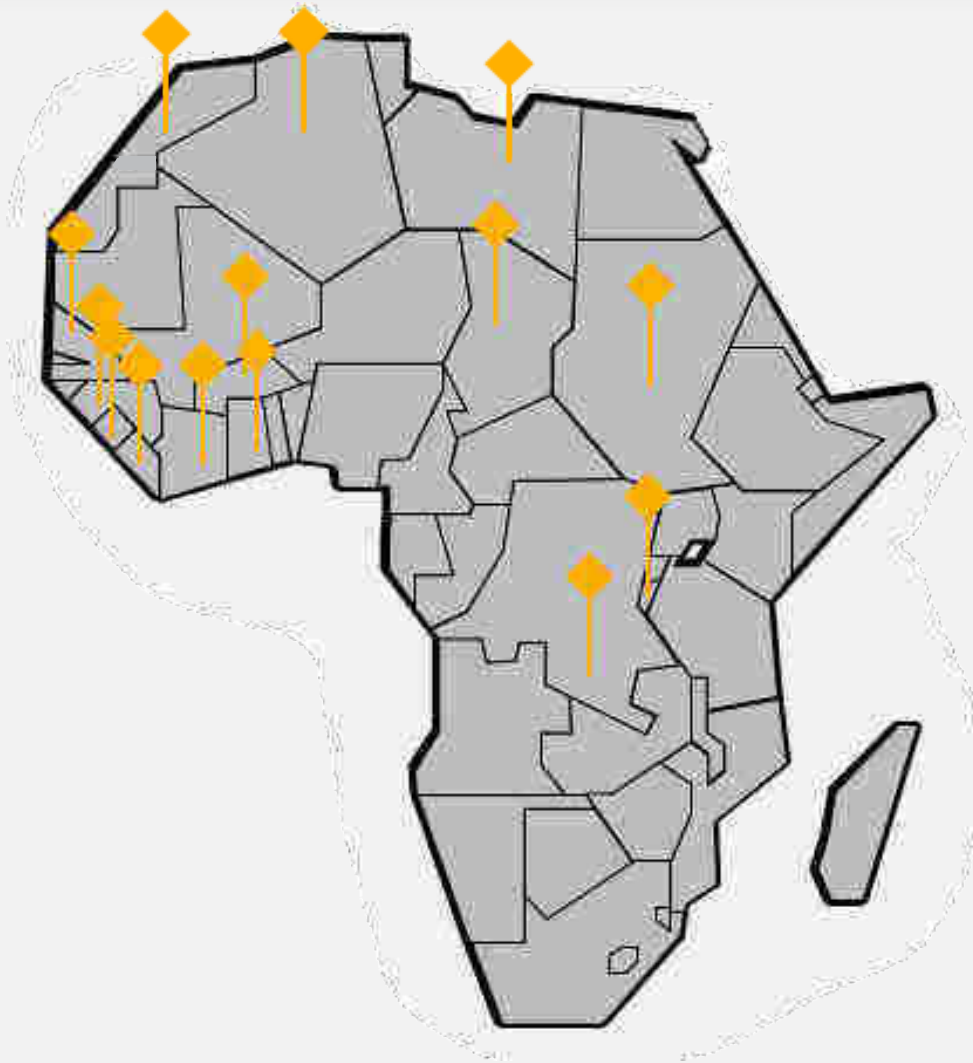

Founded in 2000 in Belgium, MATERA SA is a **SUPPLIER OF GLOBAL SOLUTIONS** specialised in consultancy, sales, assistance, maintenance and after-sales service for industrial and handling equipment in the **cement, mining and quarrying sectors**.

We are an internationally oriented company, with a multilingual working team: **French, English, German, Spanish, Arabic, Berber, Swahili, Lingala, Dutch and Russian**.

We adapt to the needs of our clients in order to respond to **the entirety of the technical issues** of mines and quarries: drilling, excavation, crushing, transport, fuel treatment, water recycling...

OUR PARTNERS IN AFRICA

Matera is a Belgian company having established partnerships in numerous countries in **Africa** :

- Algeria (Matera Algeria)
- Morocco
- Senegal
- Ivory Coast
- Sudan
- Libya
- Burundi
- DRC
- ...

Matera

MATERA ALGERIA

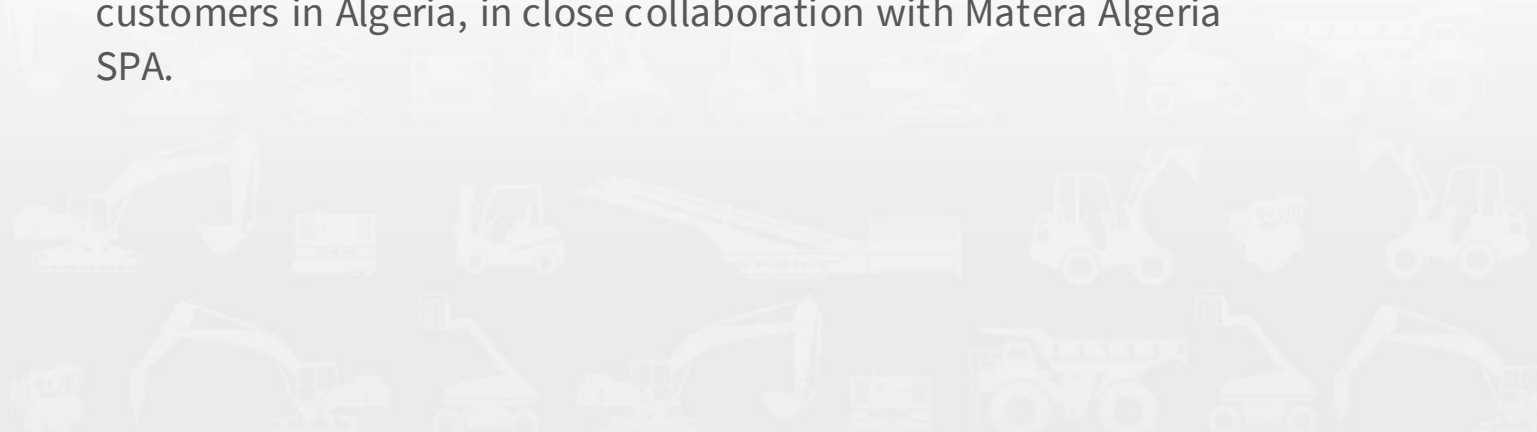

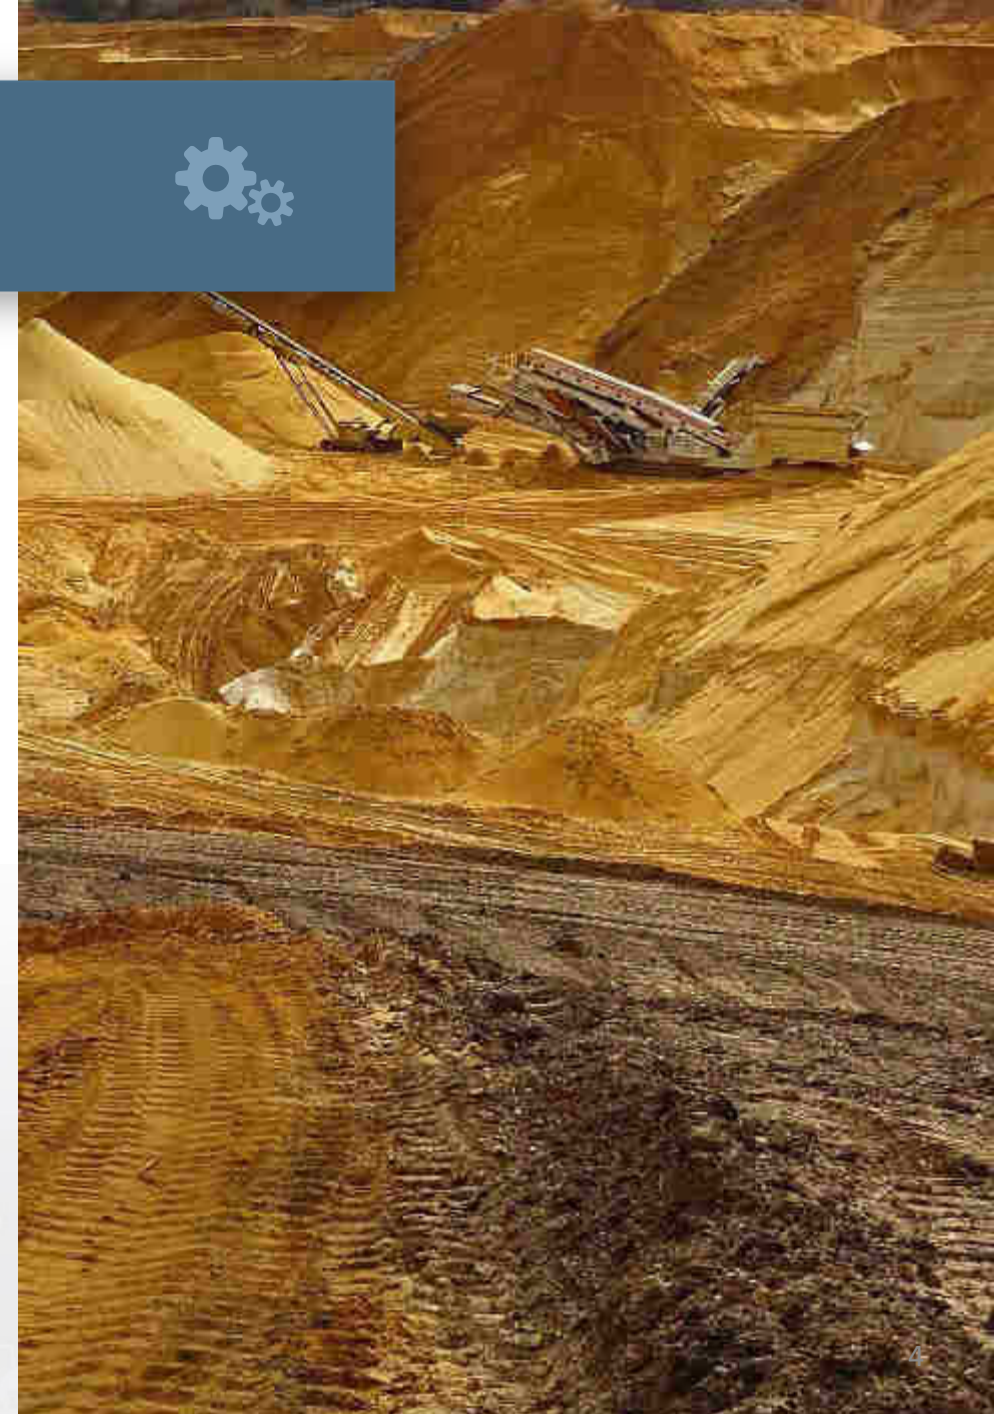

The year 2012 represents the expansion of Matera's potential through the creation of **MATERA ALGERIA SPA**.

The local technical and commercial teams guarantee the satisfaction of the after-sales service needs .

MATERA ALGERIA SPA systematically provides technical assistance to Matera's customers: commissioning, training, guarantees follow up and after-sales service.

Matera SA coordinates the various contacts and actions with suppliers, ensures the sale and delivery of equipment to customers in Algeria, in close collaboration with Matera Algeria SPA.

The running fleet sold by MATERA in Algeria since 2006 exceeds 300 units

OUR HUMAN AND MATERIAL RESOURCES

A team of specialized engineers, **trained by suppliers and technical partners**, is dedicated to our customers.

An **annual training plan** is set up by MATERA, to the attention of all the customers' technical staff, with the support and involvement of:

- Equipment suppliers (by brand and type of equipment)
- Suppliers of sub-assemblies (engines/ kinematics/ hydraulic power plant...)

Technical training is part of every sales & delivery of equipment ; the training content is validated by the manufacturer on the one hand and agreed with the customer on the other hand.

The technicians are equipped with the **requested specific tools** and **vehicles** to carry out their after-sales service missions.

OUR REFERENCES (non-exhaustive list)

RIGID DUMPERS AND LOADERS

BELAZ

With a 30% share of the world market for super-heavy mining dump trucks (85% market share for trucks from 100 to 150T, and 60% market share for trucks from 200 to 250T), and a presence in more than 80 countries, the **BELAZ** company is one of the 3 main manufacturers of dumpers and transport equipment for mining and quarrying.

BELAZ offers an electric transmission for its dumpers from 90T capacity.

The first vehicles with an electric transmission and a fully automatic driving (GPS) are operational and will be available soon.

MOBILE CRUSHING AND SCREENING EQUIPMENT

Terex® Finlay has been manufacturing a complete range of mobile crushing and screening equipment for more than 60 years. Terex® Finlay offers a wide range of mobile equipment for the mining, construction, demolition and recycling industries.

With a focus on innovation, Terex® Finlay systems enable to achieve high levels of production with low operating costs and easy maintenance.

STATIONARY CRUSHING AND SCREENING PLANTS

More than 100 years of experience in Europe and throughout the world, numerous references in the Maghreb and Africa, a design that is perfectly adapted to the heaviest quarry work: the Italian company **MEM** is a reference partner whose systems guarantee optimal operational availability thanks to their great flexibility and robustness.

ARTICULATED DUMPERS

With 60 years of experience, **Terex Trucks** has developed articulated trucks with ever-higher performance, allowing to work in excellent productivity conditions with a long service life, minimum intervention and maximum return on investment.

TEREX articulated dumpers perform heavy-duty work in all circumstances, with unrivalled reliability at all latitudes, in the intense heat of the desert or in the polar cold of Arctic regions.

TEREX TRUCK TA300

TEREX TRUCK TA400

DRILL RIGS

Founded in 1984, **Soosan** designs and produces robust equipment and machines particularly appreciated by clients : SOOSAN is internationally recognised as one of the most important manufacturers in the breakers market.

Soosan has become the leader on the Korean market and exports 70% of its products to 148 dealers and 5 subsidiaries in 70 countries.

DRILL RIGS

REL offers a wide range of drilling machines for mining applications manufactured according to international quality and safety standards. These rigs, used to drill blast holes with diameters ranging from 102 mm to 349 mm, are renowned for their robust design and reliability.

The drills are crawler-mounted, driven by diesel or electric motors, with a rotary or direct drive or hydraulically operated, and are customised to meet specific customer requirements.

REL plays a key role in providing mining sector customers with the latest and most efficient surface drilling equipment for coal, iron, copper, gold, zinc, phosphate, bauxite, lignite, limestone, etc.

TRAILERS-ARTICULATED DUMPERS

GOURDON

Specialized in the manufacturing of trailers for more than 40 years, SA **GOURDON** is a French family-owned company that designs and manufactures trailers particularly suitable for small quarries and civil works.

The BT18/25 tipper has been designed based on the principle of articulated dumpers: a large tipping amplitude, a reinforced body for the transport of abrasive materials and a running gear (double-axle with independent hydraulic motors) that can withstand the toughest conditions.

Attached to an agricultural tractor (250 Hp), it offers a unique versatility (site/road) of towed implements and adapts to the most extreme conditions.

The BT18/25 tipper is the high-performance and economical alternative to articulated dumpers.

TRANSPORT TRUCKS

MAZ is one of the largest manufacturers of trucks and buses in Eastern Europe.

Active since 1944, the company offers a wide range of vehicles with more than 500 models and modifications :

- Highway road trains for international and intercity transportations
- Dump trucks, dump road trains
- Middle tonnage trucks designed for urban, suburban and regional transportation
- Trailers and semi-trailers for the transportation of any loads
- Chassis for the installation of any equipment (cranes, refuellers,...)

ELECTRICAL MINING SHOVELS

IZ-KARTEX NAMED AFTER P.G.KOROBKOV LTD is the largest Russian manufacturer of shovel equipment and supplies machinery to mining companies in Russia and abroad, including Kazakhstan, Belarus, Uzbekistan, India, and Mongolia.

The company offers electrical crawler shovels of different standard sizes and for various climatic conditions.

The machinery features high performance, reliability, energy efficiency, low maintenance, high level of automation and an eco-friendly design.

CRANES

The Australian company **Humma Cranes** offers a range of articulated pick and carry cranes that are built for the highest levels of safety, capacity and comfort, while maintaining low running costs.

Humma Cranes are proven to be cheaper to maintain and run than the competitors' products.

Fuel savings with the Cummins automotive engine was 25% better compared to the competitors crane in a general hire environment.

They are safer and more stable on the road at speeds with cranes tested to over 100kmh.

Each crane can be customised to the end user's requirements with a range of extras from handrails, spare wheels to safety interlocks.

Fuel treatment

Waste water treatment (gray and industrial)

Modular buildings and constructions

SPARE PARTS AND SERVICE

SPARE PARTS AND SERVICE

In order to ensure the best possible after-sales service and the sale of different types of parts, MATERA has a **large stock of parts** available, divided between Belgium and Africa.

As a result, costs are considerably lowered and the speed of delivery reduces the downtime of your vehicle.

MATERA'S PROJECTS

As part of its mission to provide technical assistance and optimise the management costs of its customers' fleets of machinery and equipment, **MATERA launched in 2020 a CMMS** (Computerized Maintenance Management System) that will be systematically associated with the service contracts for machinery and equipment.

- The **responsiveness and speed** of supply circuits for spare parts is secured
- The **operational availability** of the machines is guaranteed and optimised
- Maintenance **costs and programmes** are under control
